

AMHP-300-GT

CLEAN COMFORT®
INDOOR AIR ESSENTIALS

Description

The Clean Comfort® AMHP-300-GT Duct Mount HEPA bypass air cleaner uses True HEPA media material that is certified to remove 99.97% of all particles as small as 0.3 microns (1/84,000 of an inch) from a home's air. It also helps remove odors, such as those from cooking, smoking or painting with the Carbon VOC Prefilter.

By removing particulates from the air, this air cleaner also helps protect and prolong the operating efficiency of the home's heating and cooling equipment.

It's ideal for homes with space constraints in their furnace/air conditioning rooms.

Standard Features

- The MERV 8 prefilter with activated carbon helps remove lint to prolong the life of HEPA filter and unpleasant odors, such as those from cooking, smoking, painting or other household activities
- Since the AMHP-300-GT is installed in a bypass configuration, it does not add static pressure to the HVAC system
- Versatile installation: duct mounted or collar mounted with pre-punched knockouts
- Plug-in power cord (120 VAC); no field wiring required

Cabinet Construction Features

- Heavy gauge steel cabinet with powder coat paint finish resists corrosion and provides rigid installation and durability
- Pre-punched openings at back of unit and mounting template are provided for easy duct mount installation; no external duct work required when installing in duct mount configuration
- Pre-punched openings at top and bottom of unit facilitate collar mount installation

Specifications

AMHP-300-GT	
Filtration Stage 1 & 2	Replacement Pre & Carbon Filter (AMP-101667)
Filtration Stage 3	Replacement HEPA Filter (AMP-100562)
Weight	33 Lbs.
Plenum Mount Port Openings	16" x 3.5" (406mm x 89mm)
Collar Mount Port Openings	8" (203mm) Round*
Installation Type	Plenum or Duct Mount
Electrical Supply	120 VAC @ 60 Hz
Power Consumption	134 W
Certification	CCSA US
Air Flow Data	220-300 CF.M.

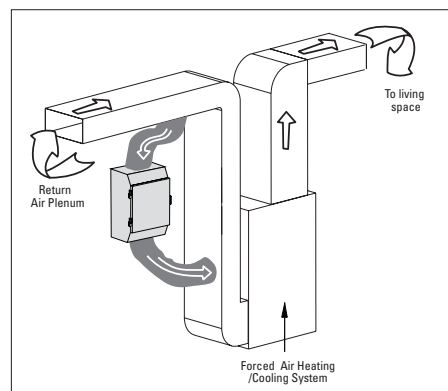

Installation Options

HEPA Mounted on Duct

Ducting Flare System

The Whole House HEPA Filtration system is designed to install directly onto the return air plenum of the forced air heating/cooling system. Choosing this type of installation eliminates the need to externally duct the HEPA filter unit to the plenum system. If you choose this type of installation, it is recommended that you run the fan on your forced air system continuously to maximize its cleaning ability.

HEPA Mounted on Wall

Collar System

Using kit no. AMP-100608 the Whole House HEPA Filtration system can be converted to use 8 inch round collars for application requiring ducting. The kit includes two, 8 inch round collars, two mounting brackets for wall or floor mounting, installation guide and fasteners.
