

Tempstar® 80% Ultra-Low NOx Gas Furnace

**Performance Series
N80ESU**

TEMPSTAR®
Heating and Cooling Products
Quality you can feel.

BUILT WITH STRENGTH

When you choose Tempstar® heating and cooling equipment, it means your home comfort is backed by superior engineering and quality manufacturing so you can enjoy more important things. Each unit is 100% run tested, and we design our products to give you the best in quality, energy efficiency and reliability. And now, with our Performance Series 80% ultra-low NOx gas furnace, our tradition of delivering products that exceed your expectations continues.

65% LOWER NOx EMISSIONS

The Tempstar Performance Series 80% ultra-low NOx gas furnace provides warm, winter heating with 65% lower nitrogen oxide (NOx) emissions than current low NOx models. NOx contributes to the formation of smog and acid rain and the deterioration of water quality. The Performance Series 80% ultra-low NOx gas furnace is a great choice for environmentally-conscious homeowners.

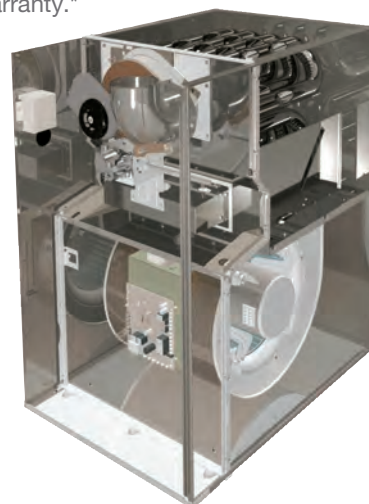

A VERSATILE CHOICE FOR INDOOR COMFORT

The Tempstar ultra-low NOx gas furnace provides versatility to better match your home and your comfort preferences. During installation, your Tempstar dealer can setup the blower fan for optimized airflow based on the heating and cooling needs for your home. To create a traditional, year-round comfort system, pair this furnace with a Tempstar air conditioner. Or, for even greater energy savings, match it with a compatible thermostat and Tempstar heat pump for a dual fuel system. With a dual fuel system, you'll enjoy enhanced heating efficiency because the system automatically selects the most energy-efficient fuel source for heating based on conditions at that time.

BACKED BY EXCEPTIONAL WARRANTIES

You get dependable comfort with every Tempstar product. We'll replace your unit if the heat exchanger fails within the covered period. We give you extra coverage in addition to a 10-year parts limited warranty.*

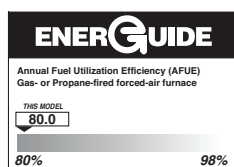

WHAT SETS TEMPSTAR GAS FURNACES APART?

- Fixed-speed constant torque ECM blower motor can be set to optimize airflow and comfort, based on the heating needs of your home while reducing the electrical consumption compared to a standard PSC furnace
- 80.0% AFUE (Annual Fuel Utilization Efficiency) heating
- Create a dual fuel system with our Performance Series 80% ultra-low NOx gas furnace and a compatible thermostat and Tempstar heat pump
- Stainless steel tubular heat exchangers offer superior corrosion resistance and heat conversion
- Blocked vent protection shuts down furnace operation if a common vent is obstructed

* 10-Year Parts Limited Warranty: Timely registration required for 10-year parts limited warranty and lifetime limited heat exchanger warranty. Limited warranty period is 5 years for parts and 20 years for heat exchanger if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will receive the registered limited warranty periods. Please see warranty certificate for further details and restrictions.

All systems tested and listed by the appropriate agencies.
